Subject Index

A

Abscisic acid
  maize cell superoxide dismutase gene response to, 217
  metabolism of, in oilseed embryo, fatty acid biosynthesis and ketoacyl-CoA synthase expression and, 979
  in potato tuberization, 575
  tobacco β-1,3-glucanase gene regulation by, 585
  tomato leaf transpiration and, 703
  in tomato wound signaling, 687
Acetabularia acetabulum, Cl^--translocating ATPase in, 718
Acid invertase, of tulip, in cloning of sucrose:sucrose 1-fructosyltransferase in onion, 1507
Acyl-acyl carrier protein desaturase, substrate specificity of, in cat's claw seeds, 593
Adenine translocator, in white lupine, 1127
Adenosine-5′-phosphosulfate kinase, in *Catharanthus roseus* and Arabidopsis, 1125
S-Adenosylmethionine synthase genes, in pea, 397
ADP-glucose, transfer of, in maize endosperm, brittle-1 role in, 1235
ADP-glucose pyrophosphorylase, of potato tuber
  glucose-1-phosphate-binding site of, 989
  starch synthesis and, 1307
Adzuki bean, seeds of, stachyose synthesis in, 165
Agrobacterium tumefaciens-induced crown galls, ethylene regulation of, on tomato stem, 841
Alanine:glyoxylate aminotransferase, in Arabidopsis, 1125
Alcohol dehydrogenase, manipulation of, in ripening tomato fruit, 1047
Aldolase, in *Cicer arietinum* epicotyl, 720
Aleurites fordii, seeds of, aquaporin and glutaredoxin in, 717
Alfalfa
  caffeoyl-coenzyme A 3-*O*-methyltransferase in, lignification and, 761
  PR264/SC35 splicing factor in, 717
  root nodules of, physiology of, oxygen effects on, 385
Algae (*see also* Macroalgae; *specific alga*)
  intracellular β-carbonic anhydrase of, 1341
Allium cepa (*see* Onion)
Allium porrum (*see* Leek)
Alternative oxidase, salt stress and, in soybean roots, 695
Aluminum, wheat root mRNA inducible by, mung bean hypocotyl auxin-regulated mRNA relation to, 718
Aluminum resistance
  of Arabidopsis mutant
    organic acid release in roots of, 9
    pH and, 19
  of buckwheat, 745, 753
Amphidinium carterae, light-regulated transcription in, 189
β-Amylase activity, allele-dependent, in barley grain, 679
Ankyrin repeats, tandem, in Arabidopsis, 1526
Anthocyanin gene *a2* promoter, in maize, 437
Anthranilate synthase, feedback-insensitive, in tobacco, 533
Antifungal proteins, during grape ripening, 465
Antioxidant status, of barley leaves, pathogens and, 1103
Apple
  ethylene receptor gene *ETR1* homolog in, 1126
  pectin fragmentation in, *Aspergillus aculeatus* rhamnogalacturonan lyase and, 141
AP2 gene superfamily structure, potato similarity to, 1127
Aquaporin
  in *Aleurites fordii* seeds, 717
  in maize tonoplast
    in cell division and elongation zones, 1143
    in epidermal and conducting tissues, 1153
Arabidopsis
  adenosine-5′-phosphosulfate kinase in, 1125
  alanine:glyoxylate aminotransferase in, 1125
  aluminum-resistant mutants of
    organic acid release in roots of, 9
    pH and, 19
  Atdrm-1–1 in, sequence of, 718
  At-hsc70–3 encoding of hsp70 in, 1525
  branched chain α-keto acid dehydrogenase complex in, dihydrolipoylacyltransferase subunit of, 331
  carbamoyl phosphate synthetase in, 717
  CCAAT-box transcription factor complex in, 1015
  cellulose synthase gene *AraxCelA* in, 1125
  in complementing of *Schizosaccharomyces pombe* mutant deficient in phytochelatin synthesis, 1526
  flowering time and floral identity in, 1
  G-box binding factor 2 in, 719
  GA4 gene in, gibberellin regulation of, 1195
  gibberellin 3β-hydroxylase in, functional analysis of, 559
  gibberellin regulation of *GLABROUS1* gene in, 375
  glutamate decarboxylase cDNA clones in, 1411
  γ-glutamyl hydrolase cDNA in, 1526
  glutathione peroxidase protein in, 331
  glutathione reductase in, 1127
  glycine-rich RNA-binding protein encoding in, 1526
  hydroperoxide lyase encoding in, 1393
  hypocotyl protoplasts of, blue light-induced shrinking of, cytochrome 1, phytochrome, and ion fluxes in, 1265
  hypocotyls of, cell-type patterning and *GLABRA2* regulation in, 73
  matrix metalloproteinase cDNA similarity to, 1127
  meristem development in, *CLAVATA1* receptor kinase regulation of, 1125
  mutants of, with reduced hexadecatrienoic acid fatty acid levels, 923
  Myb homologs in, 720
  NPH2 in, 719
  ornithine aminotransferase isolation from, during salt stress, 263
  pds1 mutation of, *p*-hydroxyphenylpyruvate dioxygenase gene and, 1317
  PHR2 gene in, and blue light photoreceptor/photolyase family, 718
  plastids of, *ndhB* gene of, 718
  roots of, cell type patterning and *GLABRA2* regulation in, 73
  tandem ankyrin repeats and glycosyl hydrolase signature in, 1526
  UMP/CMP kinase in, expression of, in *Escherichia coli*, 245
  Vps45p homolog in, and protein transport to vacuole, 407
  yeast copper homeostatis gene *ATX1* homolog in, 1227
  zinc finger protein in, 331
Araceae, ubiquinone level in, thermogenesis and, 1501
AraxCelA gene, in Arabidopsis, 1125
AS19, in sorghum, in drought, 719
Aspen, quaking, red-brown wood phenotypes of, *O*-methyltransferase gene and, 101
Aspergillus aculeatus
  rhamnogalacturonan galactopyranosyluronohydrolase in, pectin effects of, 153
  rhamnogalacturonan lyase in, apple pectin fragmentation and, 141
Atdrm-1–1, in Arabidopsis, sequence of, 718
At-hsc70–3, hsp70 encoding by, in Arabidopsis, 1525
atpA gene cluster, in *Chlamydomonas reinhardtii* chloroplasts, 629
ATX1 copper homeostatis gene, of yeast, Arabidopsis homolog of, 1227
Auxin
  deprivation of, Golgi differentiation induced by, in tobacco, 501
  growth and, in maize coleoptiles and pea internodes, 1473
  tomato response to, *diageotropin* gene and, 63
Auxin, mRNA regulated by, in mung bean hypocotyl, aluminum-inducible wheat root mRNA relation to, 718
AVR9 peptide elicitor, binding affinity and necrosis-inducing activity of, in tomato, 609, 809
AW13, in sorghum, during drought, 331

B

Bacillus thuringiensis toxin
  degradation of, 1445
  premature polyadenylation of, 1433
Barley

cysteine endoprotease in, substrate specificity of, 255
grain of, allele-dependent β-amylase activity in, 679
leaves of
antioxidant status of, pathogens and, 1103
Ca^{2+}-dependent transglutaminase activity in, 1115
cold-induced gene expression in, 787
NADH dehydrogenase binding to ferredoxin-NADP oxidoreductase in, 235
oxalate oxidase transcripts in, mildew fungus response and, 33
roots of, Ca^{2+}-dependent transglutaminase activity in, 1115
thylakoids of, photoactivated NAD(P)H dehydrogenase in, 525
Bean (*see also* Adzuki bean; Broad bean; Mung bean; Soybean)
photosystem II in, copper toxicity and, 619
seeds of, storage protein β-phaseolin bene in, 720
thylakoid biogenesis in, photosystem II during, 961
Beet, protein of, yeast V-type ATPase homology to, 859
Benzothiadiazole, parsley cells primed by, defense responses and, 1333
Beta carotene desaturase, in *Narcissus pseudonarcissus*, 719
Beta vulgaris (*see* Beet)
Betula platyphilla, cavitated and refilled vessels of, visualization of, 1463
Bitter sesquiterpene lactone biosynthesis, in chicory, 1381
blt101, *blt4.9*, and *blt14* genes, in barley leaves, 787
Blue light, Arabidopsis hypocotyl shrinking induced by, cytochrome 1, phytochrome, and ion fluxes in, 1265
Blue light photoreceptor/photolyase family, *PHR2* gene and, in Arabidopsis, 718
Boron, requirement for, in *Chenopodium album* cell walls, 1401
Branched chain α-keto acid dehydrogenase complex, dihydrolipoylacyltransferase subunit of, in Arabidopsis, 331
Brassica juncea (*see* Indian mustard)
Brassica napus (*see* Oilseed)
Brittle-1, in ADP-glucose transfer in maize endosperm, 1235
Broad bean
leaves of, Ca^{2+}-dependent transglutaminase activity in, 1115
roots of, Ca^{2+}-dependent transglutaminase activity in, 1115
Broccoli, ETR-type ethylene receptor in, 717, 1126
Buckwheat, aluminum resistance in, 745, 753

C

C_3 and C_4 species, photosynthesis and concurrent export rates in, CO_2 level and, 207
C_4 photosynthesis, in *Flaveria*, 733, 1071
Caffeoyl-coenzyme A 3-*O*-methyltransferase in alfalfa, lignification and, 761
in eucalyptus, 718
in *Populus trichocarpa*, 719
Calcium
in tobacco protoplast, 1023
transglutaminase activity dependent on, in root and leaf tissue, 1115
Calcium spikes, repetitive, in *Eremosphaera viridis*, 545
Cambial growth, in Scots pine, indoleacetic acid and, 113
Capsicum annuum (*see* Pepper)
Caraway, fruit of, limonene and carvone biosynthesis in, 901
Carbamoyl phosphate synthetase, in Arabidopsis, 717
Carbohydrate reserves, in trillium stem, fruit development and, 183
Carbon dioxide level, photosynthesis and in C_3 and C_4 species, 207
and position of wheat leaf under canopy, 1037
Carbon metabolism, in drought-stressed maize leaves, 283
β-Carbonic anhydrase, in *Coccomyxa*, 1341
Carrot
seeds of, *EP3* endochitinase genes in, 43
storage protein Gea8 in, 331
ubiquitin carboxyl extension protein in, 720
Carum carvi (*see* Caraway)
Carvone biosynthesis, in caraway fruit, 901
Cassava, cyanogenic β-glucosidase gene in, 1526
Catharanthus roseus
adenosine-5′-phosphosulfate kinase in, 1125
desacetoxyvinoline 4-hydroxylase in, developmental and light regulation of, 1351
Cat's claw, seeds of, protein engineering of fatty acid desaturases in, 593
CCAAT-box transcription factor complex, in Arabidopsis, 1015
Cell, of rice, fructose-1,6-bisphosphatase in, 332
Cell cycle kinase activity, in wheat leaves, drought and, 667, 1525
Cellulose synthase gene *AraxCelA*, in Arabidopsis, 1125
Chenopodium album, boron requirement and cell wall properties of, 1401
Chickpea
epicotyls of, protein in homologous to phosphate-starvation-induced protein, 1525
seeds of, cytokinin *cis*-isomers in, 1515
Chicory, bitter sesquiterpene lactone biosynthesis in, 1381
Chilling injury, in tomato, heat-shock proteins in protection against, 651
Chitin fragments, in tomato, perception system for, desensitization of, 643
Chlamydomonas reinhardtii
chloroplast *atpA* gene cluster in, 629
NADPH-dependent NO_2-reducing system in, 303
nutrient deprivation in, photosynthesis and, 129
photosystem II in, D2 polypeptide threonine mutation and, 515
tryptophan synthase β in, 455
Chlorophyll *a/b*-binding protein, light-harvesting, in photosystem II of Sugi tree, 1126
Chlorophyll biosynthesis, temperature and, in cucumber and wheat, 851
Chloroplasts
of *Chlamydomonas reinhardtii*, *atpA* gene cluster in, 629
of maize, plastid operon transcription of, 1495
of tobacco, plastid operon transcription of, 1495
Cicer arietinum (*see* Chickpea)
epicotyl of
cytosolic aldolase in, 720
glyoxalase-I in, 331
ribosomal protein L24 homolog in, 717
Cichorium intybus (*see* Chicory)
Cinnamoyl-CoA reductase gene, in *Populus trichocarpa*, 1126
Cinnamyl-alcohol dehydrogenase gene, in Monterey pine, 1125
Cl^--translocating ATPase, in *Acetabularia acetabulum*, 718
Cladosporium fulvum AVR9 peptide elicitor, binding affinity and necrosis-inducing activity of, in tomato, 609, 809
CLAVATA1 receptor kinase, Arabidopsis meristem development regulation by, 1125
Coccomyxa, intracellular β-carbonic anhydrase of, 1341
Cold-induced genes, in barley leaves, 787
Coleoptiles, of maize
auxin-growth relationship in, 1473
endoglucanase in, 1525
Copper homeostatis gene *ATX1*, of yeast, Arabidopsis homolog of, 1227
Copper toxicity, photosystem II and, in bean, 619
Corn (*see* Maize)
Cotton, fibers of, cDNAs expressed in, 1525
Cress, roots of, gravitropic curvature of, autonomic straightening after, 893
Cryptomeria japonica (*see* Sugi tree)
Cucumber
chlorophyll biosynthesis in, temperature and, 851
hypocotyl of, cutin monomer and surface wax constituent-elicited H_2O_2 in, 1373
Cucumis melo (*see* Melon)
Cucumis sativus (*see* Cucumber)
Cucurbita pepo (*see* Zucchini)
Cysteine endoprotease, in barley, substrate specificity of, 255
Cytochrome 1, in blue light-induced Arabidopsis hypocotyl shrinkage, 1265
Cytochrome P450, in marine macroalgae, 123
Cytokines, tomato *diageotropin* gene and, 63
Cytokinin, *cis*-isomers of, chickpea seed development and, 1515

D

Darkness, extended, in carbon starvation-related induction of proteolysis, in maize, 1281
Daucus carota (*see* Carrot)

Desacetoxyvinoline 4-hydroxylase, in *Catharanthus roseus*, developmental and light regulation of, 1351
Dicyclohexylcarbodiimide, retardation of zeaxanthin formation by, in pea, 659
Dihydroflavonol 4-reductase gene, strawberry fruit ripening and, 711
Dimethylsulfoniopropionate biosynthesis, in *Spartina alterniflora*, 273
DNA polymerase delta, in soybean, 333
DnaJ, homology to gene in potato tuberization and tobacco flowering, 1127
Doxantha unguis-cati (*see* Cat's claw)
Drought
  carbon metabolism during, in maize leaves, 283
  maize protein changes and, 1253
  nitrate reductase overexpression during, in tobacco, 293, 721
  pea during, 173
  sorghum AS19 in, 719
  sorghum AW13 in, 331
  transgene expression regulated by, in rice plants, 913
  wheat leaves in, cell cycle kinase activity in, 667, 1525

E

Ectomycorrhizal fungus colonization, on eucalyptus roots, NADP-dependent isocitrate dehydrogenase in, 939
EDTA, and lead transport and accumulation, in Indian mustard, 447
Electronic plant gene register, 331, 717, 1125, 1525
Elm, seeds of, phospholipase A_2 purification from, 197
Elongation factor 1α, eukaryotic, phosphoglycerylethanolamine modification of, 949
Embryo, of oilseed, very-long-chain monounsaturated fatty acid biosynthesis and ketoacyl-CoA synthase expression in, abscisic acid metabolism and, 979
Endochitinase gene *EP3*, in developing carrot seeds, 43
Endoglucanase, in maize coleoptile, 1525
Endosperm, of maize, ADP-glucose transfer in, brittle-1 role in, 1235
Epicotyls
  of chickpea, protein in homologous to phosphate-starvation-induced protein, 1525
  of *Cicer arietinum*
    cytosolic aldolase in, 720
    glyoxalase-I in, 331
    ribosomal protein L24 homolog in, 717
Eremosphaera viridis, repetitive calcium spikes in, 545
Escherichia coli, *Arabidopsis thaliana* UMP/CMP kinase expression in, 245
Ethylene receptor, ETR type
  in apple, 1126
  in broccoli, 717, 1126
Eucalyptus
  caffeoyl-coenzyme A 3-*O*-methyltransferase in, 718
  roots of, NADP-dependent isocitrate dehydrogenase in, 939
Eukaryotes
  elongation factor 1α in, phosphoglycerylethanolamine modification of, 949
  signaling pathways in, 723, 923
Euphorbia characias, latex amine oxidase of, 1363

F

Fagopyrum esculentum (*see* Buckwheat)
Fatty acid desaturase, protein engineering of, in cat's claw seeds, 593
Fatty acid(s)
  hexadecatrienoic acid, in Arabidopsis mutants, 923
  very-long-chain monounsaturated, oilseed embryo biosynthesis of, abscisic acid metabolism and, 979
Feedback, anthranilate synthase insensitive to, in tobacco, 533
Ferredoxin-NADP oxidoreductase, NADH dehydrogenase binding to, in barley leaves, 235
Flaveria
  C_4 photosynthesis in, 733
    tobacco carbonic anhydrase expression and, 1071
  pyruvate orthophosphate dikinase in, 821
Flavonoid signals, in soybean roots, 599
Flowers
  of Arabidopsis, 1
  of tobacco, DnaJ homology to gene in, 1127
  of tomato, temperature-induced abnormalities in, 91
Formate dehydrogenase genes, in potato, 719
Fragaria (*see* Strawberry)
Fructokinases, of tomato, differential expression and regulation of, 85
Fructose-1,6-bisphosphatase, in rice, 332
Fruit
  of caraway, limonene and carvone biosynthesis in, 901
  of pepper, isoprenoid biogenesis in, 1423
  of tomato
    cell wall pectic polymers of, polygalacturonase and, 1293
    mitogen-activated kinase kinase gene regulation in, 1526
  of trillium, stem carbohydrate reserves and, 183
Fruit ripening
  in grape, antifungal proteins and hexoses during, 465
  in melon
    cell wall disassembly during, 345
    pectin disassembly during, 363
  in strawberry, dihydroflavonol 4-reductase gene and, 711
  in tomato
    alcohol dehydrogenase manipulation in, 1047
    β-galactosidase II gene in, 417
Fungus, barley response to, oxalate oxidase transcripts and, 33

G

β-Galactosidase II gene, in ripening tomato fruit, 417
G-box binding factor 2, in Arabidopsis, 719
Genome sequencing and informatics, 1129
Geranylgeranyl pyrophosphate synthase, in sunflower, 1525
(+)-Germacrene A biosynthesis, in chicory, 1381
Germination, of oilseed, tricarboxylic acid cycle bypass in, 473
Gibberellin
  Arabidopsis *GA4* gene regulation by, 1195
  Arabidopsis *GLABROUS1* gene regulation by, 375
  OSH1-induced decrease in, gibberellin 20-oxidase gene expression and, 1179
  in potato tuberization, 575
Gibberellin 3β-hydroxylase, in Arabidopsis, functional analysis of, 559
GLABRA2 gene, in Arabidopsis hypocotyl and roots, cell type patterning and, 73
GLABROUS1 gene, in Arabidopsis, gibberellin regulation of, 375
β-1,3-Glucanase genes, in tobacco, abscisic acid regulation of, 585
Glucose-1-phosphate-binding site, of potato tuber ADP-glucose pyrophosphorylase, 989
β-Glucosidase gene, canogenic, in cassava, 1526
Glutamate decarboxylase, in Arabidopsis, 1411
γ-Glutamyl hydrolase cDNA, in Arabidopsis, 1526
Glutaredoxin, in *Aleurites fordii* seeds, 717
Glutathione peroxidase, in Arabidopsis, 331
Glutathione reductase, Arabidopsis gene structure similarity to, 1127
Glutathione *S*-transferase
  in rice, 1126
  in sorghum, 877
Glutathione *S*-transferase GSTa, in soybean, 332
Glycine max (*see* Soybean)
Glycosyl hydrolase signature, in Arabidopsis, 1526
Glytamyl-tRNA reductase, in rice, 332
Golgi differentiation, auxin deprivation-induced, in tobacco, 501
Golgi vesicles, of pea stem, UDP-glucose metabolism in, 1007
Gossypium (*see* Cotton)
Grain, of barley, allele-dependent β-amylase activity in, 679
Grape, fruit ripening in, antifungal proteins and hexoses during, 465
GST (*see* Glutathione *S*-transferase)

H

H^+-ATPase, pH adaptation of, in maize roots, 311, 1525
Heat-shock proteins
  At-hsc70–3 encoding of, in Arabidopsis, 1525
  in tomato
    cloning of, 718
    cytoplasmic class II small, 1125
    in protection against chilling injury, 651
Heat-shock response, regulation of, 1135
Helianthus annuus (*see* Sunflower)

Heterosigma carterae, phosphoribulokinase in, 321
Hexadecatrienoic acid fatty acid level, in Arabidopsis mutants, 923
Hexoses, antifungal, during grape ripening, 465
Histidinol dehydrogenase, in *Thlaspi goesingense*, 332
Hordeum vulgare (*see* Barley)
Hydrogen peroxide, elicited by cutin monomers and surface wax constituents, in cucumber hypocotyl, 1373
Hydroperoxide lyase, Arabidopsis gene encoding, 1393
p-Hydroxyphenylpyruvate dioxygenase gene, of *pds1* mutation of Arabidopsis, 1317
Hypocotyls
of Arabidopsis
blue light-induced shrinking of, cytochrome 1, phytochrome, and ion fluxes in, 1265
cell-type patterning and *GLABRA2* regulation in, 73
of cucumber, cutin monomer and surface wax constituent-elicited H_2O_2 in, 1373
of mung bean, auxin-regulated mRNA in, aluminum-inducible wheat root mRNA relation to, 718
of zucchini, spermidine binding to, 971

I

Imidazoleglycerol-phosphate dehydratase, in *Thlaspi goesingense*, 332
Indian mustard
lead transport and accumulation in, EDTA and, 447
selenium assimilation and volatilization by, 1487
Indoleacetic acid, Scots pine cambial growth and, 113
Internodes, of pea, auxin-growth relationship in, 1473
Ion fluxes, in blue light-induced Arabidopsis hypocotyl shrinkage, 1265
Iron superoxide dismutase, overexpression of, in poplar, 565
*Irt*A, in *Synechococcus*, transcriptional and posttranscriptional control of, 225
Isocitrate dehydrogenase, eucalypt NADP-dependent, 939
Isoflavonoids, of soybean, *Phytophthora sojae* hyphae response to, 1171
Isoprenoid biogenesis, in pepper fruit, 1423

J

JAB1 transcriptional coactivator, human, rice Osjab1 homology to, 1526

K

Ketoacyl-CoA synthase expression, in oilseed embryo, abscisic acid metabolism and, 979
Kidney bean (*see* Bean)
Knox class 1 full-length cDNA, in pea shoot tips, 1125

L

Latex amine oxidase, in *Euphorbia characias*, 1363
Lead, transport and accumulation of, in Indian mustard, EDTA and, 447
Leaves
of barley
antioxidant status of, pathogens and, 1103
cold-induced gene expression in, 787
NADH dehydrogenase binding to ferredoxin-NADP oxidoreductase in, 235
of maize, drought-stressed, nitrogen and carbon metabolism in, 283
of pea, drought and ultraviolet-B effects on, 173
of tomato
LeT6 gene overexpression in, 771
senescence of, mitogen-activated kinase kinase gene regulation in, 1526
transpiration in, xylem pH and, 703
of wheat
in drought, cell cycle kinase activity in, 667, 1525
position of within canopy, photosynthesis CO_2 acclimation and, 1037
Leek, seedlings of, sterol transport to, 931
Lepidium sativum (*see* Cress)
LeT6 gene overexpression, in tomato leaves, 771
Light
blue (*see* Blue light *entries*)
regulation of *Catharanthus roseus* desacetoxyvinoline 4-hydroxylase by, 1351
tomato mutant gene expression regulated by, 797
transcription mediated by, in *Amphidinium carterae*, 189
Light/dark cycles, in carbon starvation-related induction of proteolysis, in maize, 1281
Light-harvesting chlorophyll *a/b*-binding protein, in photosystem II of Sugi tree, 1126
Limonene biosynthesis, in caraway fruit, 901
Lipid mobilization, in germinating oilseeds, tricarboxylic acid cycle bypass in, 473
Lipid transfer protein, in rice, 333
Lycopersicon esculentum (*see* Tomato)

M

Macroalgae, marine, cytochrome P450 in, 123
MADS-box genes
in Monterey pine, 55
in tomato, temperature-induced flower abnormalities and, 91
Maize
anthocyanin gene *a2* promoter in, 437
chloroplasts of, plastid operon transcription of, 1495
coleoptiles of
auxin-growth relationship in, 1473
endoglucanase in, 1525
cytosolic phosphoglucomutase in, 997
cytosolic superoxide dismutase genes in, abscisic acid and osmoticum responses of, 217
endosperms of, ADP-glucose transfer in, brittle-1 role in, 1235
induction of carbon-starvation-related proteolysis in, 1281
leaves of, drought-stressed, nitrogen and carbon metabolism in, 283
photosystem I in, PsaH and PsaN subunits of, 719
roots of
adaptation of to low pH, 311, 1525
malic enzyme in, 332
storage starch structure in, SU1 isoamylase and, 425
tonoplast aquaporin in
in cell division and elongation zones, 1143
in epidermal and conducting tissues, 1153
water deficit in, protein changes and, 1253
Malic enzyme, in maize root, 332
Malus domestica (*see* Apple)
Manihot esculenta (*see* Cassava)
Matrix metalloproteinase cDNA, Arabidopsis similarity to, 1127
Medicago sativa (*see* Alfalfa)
Medicago truncatula
nodule organogenesis in, *Enod8* gene and, 1127
root hair of, expressed sequence tags from, 1325
Melon
fruit of
cell wall disassembly during ripening, 345
pectin disassembly in, polygalacturonase in, 363
polygalacturonase genes in, 363
Meristem development, in Arabidopsis, *CLAVATA1* receptor kinase regulation of, 1125
O-Methyltransferase gene, quaking aspen red-brown wood phenotypes and, 101
Mildew fungus, barley response to, oxalate oxidase transcripts and, 33
Mitogen-activated kinase kinase gene, in tomato during fruit development, leaf senescence, and wounding, 1526
Monterey pine
cinnamyl-alcohol dehydrogenase gene in, 1125
family of MADS-box genes in, 55
Mung bean, hypocotyls of, auxin-regulated mRNA in, aluminum-inducible wheat root mRNA relation to, 718
Mustard (*see also* Indian mustard)

N

NADH dehydrogenase, ferredoxin-NADP oxidoreductase binding by, in barley leaves, 235
NADP-malic enzyme, in C_4 photosynthesis, in *Flaveria*, 733
NAD(P)H dehydrogenase, photoactivated, in barley thylakoids, 525
Narcissus pseudonarcissus, beta carotene desaturase in, 719
ndhB gene, of Arabidopsis plastids, 718
Nicotiana (*see* Tobacco)
Nitrate reductase, level of, in drought-stressed tobacco, 293, 721

Nitrate reduction, NADPH-dependent, in *Chlamydomonas reinhardtii*, 303
Nitrogen metabolism, in drought-stressed maize leaves, 283
Nodules
of alfalfa, physiology of, oxygen and, 385
of *Medicago truncatula*, nodule organogenesis in, *Enod8* gene and, 1127
NPH2, in Arabidopsis, 719

O

Oilseed
embryo of, very-long-chain monounsaturated fatty acid biosynthesis and ketoacyl-CoA synthase expression in, abscisic acid metabolism and, 979
germinating, tricarboxylic acid cycle bypass in, 473
Onion, sucrose:sucrose 1-fructosyltransferase in, 1507
Organic acid release, from roots of aluminum-resistant Arabidopsis, 9
Ornithine aminotransferase, in Arabidopsis, during salt stress, 263
Oryza sativa (*see* Rice)
OSH1 gene overexpression, gibberellin content decrease and 20-oxidase gene suppression induced by, 1179
Osjab1, as rice homolog of human JAB1 transcriptional coactivator, 1526
Osmoticum, maize cell superoxide dismutase gene response to, 217
Oxalate oxidase transcripts, and barley response to mildew fungus, 33
Oxalic acid
aluminum detoxification by, 753
buckwheat root tip secretion of, aluminum induction of, 745
Oxidative burst, in tomato, systemin and, 1031
Oxygen, alfalfa nodule physiology and, 385

P

PAM1 (plant adhesion molecule 1), cDNA cloning and expression of, 1525
Parsley, benzothiadiazole-primed cells of, defense responses and, 1333
Patterning of cell, in Arabidopsis hypocotyl and roots, 73
pds1 mutation of Arabidopsis, *p*-hydroxyphenylpyruvate dioxygenase gene and, 1317
Pea
S-adenosylmethionine synthase genes in, 397
drought-stressed, ultraviolet-B radiation effects on, 173
internodes of, auxin-growth relationship in, 1473
shoot tips of, Knox class 1 full-length cDNA in, 1125
stems of, Golgi vesicles of, UDP-glucose metabolism in, 1007
sucrose synthase gene in, 719
zeaxanthin formation in, dicyclohexylcarbodiimide and, 659
Peach
pollen tube elongation in, bacterial cellulose-binding domain and, 1185
proteasome subunit 7 homolog in, 332
Pectic polymers, in tomato fruit cell wall, polygalacturonase and, 1293
Pectin
Aspergillus aculeatus rhamnogalacturonan galactopyranosyluronohydrolase and, 153
Aspergillus aculeatus rhamnogalacturonan lyase and, 141
disassembly of, polygalacturonases and, 337, 363
Pepper, fruit of, isoprenoid biogenesis in, 1423
Petroselinum crispum (*see* Parsley)
pH
low, maize root adaptation to, 311, 1525
in rhizosphere, as cause of aluminum resistance in Arabidopsis mutant, 19
of xylem, tomato leaf transpiration and, 703
Phaseolus vulgaris (*see* Bean)
Phosphate starvation-induced protein, chickpea epicotyl protein homology to, 1525
Phosphoglucomutase, cytosolic, in maize, 997
Phosphoglycerylethanolamine, eukaryotic elongation factor 1α modification by, 949
Phospholipase A_2, from elm seeds, 197
Phosphoribulokinase, in *Heterosigma carterae*, 321
Photosynthesis
in C_3 and C_4 species, CO_2 level and, 207
C_4, in *Flaveria*, 733, 1071
in *Chlamydomonas reinhardtii*, starvation and, 129
in drought-stressed maize leaves, 283
in drought-stressed pea, ultraviolet-B radiation and, 173
elevated CO_2 acclimation of, and position of wheat leaf under canopy, 1037
in poplar, iron superoxide dismutase overexpression and, 565
Photosystem I, in maize, PsaH and PsaN subunits of, 719
Photosystem II
in bean, copper toxicity and, 619
in *Chlamydomonas reinhardtii*, D2 polypeptide threonine mutation and, 515
during bean thylakoid biogenesis, 961
light-harvesting chlorophyll *a/b*-binding protein of, in Sugi tree, 1126
stepwise photoinhibition of, 483
Photosystem(s), of *Synechocystis* species, *pmgA* gene regulation of, 1205
PHR2 gene, in Arabidopsis, and blue light photoreceptor/photolyase family, 718
Phytochelatin synthesis, *Schizosaccharomyces pombe* mutant deficient in, Arabidopsis cDNA complementing of, 1526
Phytochrome, in blue light-induced Arabidopsis hypocotyl shrinkage, 1265
Phytochrome B, potato tuberization and, 29
Phytophthora sojae hyphae, response of, to soybean isoflavonoids and artificial substrates, 1171
Pine (*see* Monterey pine; Scots pine)
Pinus radiata (*see* Monterey pine)
Pinus sylvestris (*see* Scots pine)
Pisum sativum (*see* Pea)
Plant gene register, electronic, 331, 717, 1125, 1525
Plasma membrane, of leek seedlings, sterol transport to, 931
Plastid
of Arabidopsis, *ndhB* gene of, 718
of rice, fructose-1,6-bisphosphatase in, 332
Plastid *rpo* genes, RNA polymerase subunits in, 1165
pmgA gene, *Synechocystis* species photosystem regulation by, 1205
Pollen tubes, of peach, elongation of, bacterial cellulose binding domain and, 1185
Polygalacturonase
pectin disassembly and, 337, 363
tomato fruit cell wall pectic polymers and, 1293
Poplar, iron superoxide dismutase overexpression in, 565
Populus tremula × *Populus alba* (*see* Poplar)
Populus tremuloides (*see* Quaking aspen)
Populus trichocarpa
caffeoyl-coenzyme A 3-*O*-methyltransferase in, 719
cinnamoyl-CoA reductase in, 1126
Potato
AP2 gene superfamily structure and, 1127
formate dehydrogenase genes in, 719
salicylic acid biosynthesis in, 1095
starch-branching enzyme 1 of, phosphorylated α(1–4)glucans as substrates for, 869
tuber of, ADP-glucose pyrophosphorylase in
glucose-1-phosphate binding site of, 989
starch synthesis and, 1307
tuberization of
DnaJ homology to gene in, 1127
graft-transmissible signal in, phytochrome B and, 29
roles of gibberellin, abscisic acid, and sucrose in, 575
Prokaryotes, signaling pathways in, 723, 923
Proteasome subunit 7 homolog, in peach, 332
Proteolysis, carbon starvation-related induction of, in maize, 1281
Protoplast, of tobacco, cytosolic calcium in, 1023
PR264/SC35 splicing factor, in alfalfa, 717
Prunus persica (*see* Peach)
Pyruvate orthophosphate dikinase, in *Flaveria*, 821

Q

Quaking aspen, red-brown wood phenotypes of, *O*-methyltransferase gene and, 101

R

Radiation (*see* Ultraviolet-B radiation)
Red beet protein, yeast V-type ATPase homology to, 859
Red kidney bean (*see* Bean)
Respiratory chain, in soybean roots, 1083

Rhamnogalacturonan galactopyranosyluronohydrolase, from *Aspergillus aculeatus*, pectin effects of, 153
Rhamnogalacturonan lyase, from *Aspergillus aculeatus*, apple pectin fragmentation and, 141
Ribonucleic acid-binding protein, glycine-rich
encoding of in Arabidopsis, 1526
in rice, 1526
Ribosomal protein L24 homolog, in *Cicer arietinum* epicotyl, 717
Ribulose-1,5-bisphosphate carboxylase/oxygenase
in spinach, inhibition of, 1059
in *Zantedeschia aethiopica*, 332
Rice
drought-stress-regulated transgene expression in, 913
fructose-1,6-bisphosphatase in, 332
glycine-rich RNA-binding protein encoding in, 1526
glutamyl-tRNA reductase in, 332
GST in, 1126
lipid transfer protein in, 333
Osjab1, human JAB1 transcriptional coactivator homology to, 1526
Ripening
of melon fruit
cell wall disassembly during, 345
pectin disassembly in, 363
of tomato fruit, β-galactosidase II gene in, during ripening, 417
Root hair, of *Medicago truncatula*, expressed sequence tags from, 1325
Roots
of aluminum-resistant Arabidopsis, organic acid release from, 9
of Arabidopsis, cell-type patterning and *GLABRA2* regulation in, 73
of cress, gravitropic curvature of, autonomic straightening after, 893
of eucalyptus, NADP-dependent isocitrate dehydrogenase in, 939
of maize
adaptation of to low pH, 311, 1525
malic enzyme in, 332
of soybean
flavonoid signals in, 599
respiratory chain regulation in, 1083
salt stress and, 695
of wheat, aluminum-inducible mRNA in, mung bean hypocotyl auxin-regulated mRNA relation to, 718
Rosa damascena (*see* Rose cells)
Rose cells, superoxide synthases of, 1301
Rubisco (*see* Ribulose-1,5-bisphosphate carboxylase/oxygenase)

S

Saccharomyces cerevisiae, V-type ATPase of, red beet protein homology to, 859
Salicylic acid biosynthesis, in potato, 1095
Salix sachalinensis, cavitated and refilled vessels of, visualizations of, 1463
Salt stress
Arabidopsis ornithine aminotransferase during, 263
carbonic anhydrase induced by, in tobacco, 1126
soybean root effects of, 695
Schizosaccharomyces pombe mutant, deficient in phytochelatin synthesis, Arabidopsis cDNA complementing of, 1526
Scots pine, cambial growth in, indoleacetic acid and, 113
Seedlings, of leek, sterol transport to, 931
Seeds
of adzuki bean, stachyose synthesis in, 165
of *Aleurites fordii*
aquaporin in, 717
glutaredoxin in, 717
of bean, storage protein β-phaseolin bene in, 720
of carrot, *EP3* endochitinase genes in, 43
of cat's claw, protein engineering of fatty acid desaturases in, 593
of chickpea, cytokinin *cis*-isomers in, 1515
of elm, phospholipase A_2 purification from, 197
Selenium, assimilation and volatilization of, in Indian mustard, 1487
Shoot tips, of pea, Knox class 1 full-length cDNA in, 1125
Signal transduction, prokaryote and eukaryote pathways for, 723, 923
Sinorhizobium fredii, perception of soybean root flavonoid signals by, 599
SKP1-like gene, in tobacco, during cell cycle, 1525
Solanum tuberosum (*see* Potato)
Sorbitol-6-phosphate dehydrogenase, in tobacco, 831
Sorghum
AS19 in, in drought, 719
GST in, 877
Sorghum bicolor, drought-stressed, AW13 in, 331
Soybean
DNA polymerase delta in, 333
GSTa in, 332
isoflavonoids of, *Phytophthora sojae* hyphae response to, 1171
roots of
flavonoid signals in, 599
respiratory chain regulation in, 1083
salt stress and, 695
Spartina alterniflora, dimethylsulfoniopropionate biosynthesis in, 273
Spermidine, binding of, to zucchini hypocotyl plasma membrane proteins, 971
Spinach, Rubisco inhibition in, 1059
Spinacia oleracea (*see* Spinach)
Stachyose synthesis, in adzuki bean, 165
Starch synthesis, in potato tuber, ADP-glucose pyrophosphorylase and, 1307
Starch-branching enzyme 1, of potato, phosphorylated α(1–4)glucans as substrates for, 869
Starvation, photosynthesis and, in *Chlamydomonas reinhardtii*, 129
Stems
of pea, Golgi vesicles of, UDP-glucose metabolism in, 1007
of tomato, *Agrobacterium tumefaciens*-induced crown galls on, ethylene regulation of, 841
of trillium, carbohydrate reserves in, fruit development and, 183
Sterol, transport of, to leek seedling plasma membrane, 931
Storage protein β-phaseolin bene, in bean seed, 720
Storage protein Gea8, in carrot, 331
Storage starch structure, SU1 isoamylase and, in maize, 425
Strawberry, fruit ripening in, dihydroflavonol 4-reductase gene and, 711
Sucrose, in potato tuberization, 575
Sucrose synthase, in pea, 719
Sucrose:sucrose 1-fructosyltransferase, in onion, 1507
Sugi tree, photosystem II of, light-harvesting chlorophyll *a/b*-binding protein in, 1126
Sunflower
complete PAL cDNA in, 719
geranylgeranyl pyrophosphate synthase in, 1525
Superoxide dismutase genes, in maize cells, abscisic acid and osmoticum responses of, 217
Superoxide radicals, tobacco production of, 491
SU1 isoamylase, in storage starch structure, in maize, 425
Synechococcus, *IrtA* in, transcriptional and posttranscriptional control of, 225
Synechocystis species
PCC 6803 mutants of, photoinhibition in, subevents in, 483
photosystem stoichiometry in, *pmgA* gene regulation of, 1205
Systemin, tomato oxidative burst and, 1031

T

Temperature, tomato flower abnormalities and, 91
Temperature stress, chlorophyll biosynthesis and, in cucumber and wheat, 851
Thermogenesis, ubiquinone level and, in Araceae, 1501
Thlaspi goesingense, histidine biosynthetic pathway in, 332
Thylakoid biogenesis, in bean, photosystem II during, 961
Thylakoids, of barley, photoactivated NAD(P)H dehydrogenase in, 525
Tobacco
auxin deprivation-induced Golgi differentiation in, 501
chloroplast of, plastid operon transcription of, 1495
drought-stressed, nitrate reductase overexpression in, 293, 721
feedback-insensitive anthranilate synthase in, 533
flowering of, DnaJ homology to gene in, 1127
β-1,3-glucanase genes in, abscisic acid regulation of, 585
protoplasts of, cytosolic calcium in, 1023
salt stress-induced carbonic anhydrase in, 1126
SKP1-like gene in, during cell cycle, 1525
sorbitol-6-phosphate dehydrogenase in, 831
superoxide production in, 491
Tobacco carbonic anhydrase, expression of in *Flaveria*, C_4 photosynthesis and, 1071

Tomato
AVR9 peptide elicitor in, binding affinity and necrosis-inducing activity of, 609, 809
cell wall pectic polymers in, polygalacturonase and, 1293
chilling injury in, heat-shock proteins in protection against, 651
diageotropin gene in, auxin and cytokine responses and, 63
flowers of, temperature-induced abnormalities in, 91
fructokinases of, differential expression and regulation of, 85
fruit ripening in
alcohol dehydrogenase manipulation in, 1047
β-galactosidase II gene in, 417
heat-shock proteins in, 718
cytoplasmic class II small, 1125
high pigment-1 mutant of, light-regulated gene expression in, 797
leaves of
LeT6 gene overexpression in, 771
transpiration in, xylem pH and, 703
mitogen-activated kinase kinase gene in, during fruit development, leaf senescence, and wounding, 1526
oxidative burst in, systemin and, 1031
perception system for chitin fragments in, desensitization of, 643
stems of, *Agrobacterium tumefaciens*-induced crown galls on, ethylene-induced, 841
TCTR2 sequence in, Arabidopsis CTR1 homolog encoded by, 1126
wound signaling in, abscisic acid in, 687
Transglutaminase activity, calcium-dependent, in root and leaf tissue, 1115
Tricarboxylic acid cycle bypass, in germinating oilseeds, 473
Trillium, fruit development in, stem carbohydrate reserves and, 183
Triticum aestivum (*see* Wheat)
Tryptophan synthase β, in *Chlamydomonas reinhardtii*, 455
Tuber, of potato, ADP-glucose pyrophosphorylase in
glucose-1-phosphate-binding site of, 989
starch synthesis and, 1307
Tuberization, of potato
DnaJ homology to gene in, 1127
graft-transmissible signal in, phytochrome B and, 29
roles of gibberellin, abscisic acid, and sucrose in, 575
Tulip, acid invertase of, in cloning of sucrose:sucrose 1-fructosyltransferase in onion, 1507

U

Ubiquinone, thermogenesis and, in Araceae, 1501
Ubiquitin carboxyl extension protein, in carrot, 720
UDP-glucose metabolism, in pea stem Golgi vesicles, 1007
Ulmus glabra (*see* Elm)
Ultraviolet-B radiation, drought-stressed pea effects of, 173
UMP/CMP kinase, in Arabidopsis, expression of, in *Escherichia coli*, 245

V

Vacuole, of Arabidopsis, protein transport to, Vps45p homolog and, 407
Vicia faba (*see* Broad bean)
Vigna angularis (*see* Adzuki bean)
Vitis labruscana (*see* Grape)
Vps45p homolog, in Arabidopsis, protein transport and, 407

W

Water stress (*see* Drought)
Wheat
chlorophyll biosynthesis in, temperature and, 851
leaves of
Ca^{2+}-dependent transglutaminase activity in, 1115
in drought, cell cycle kinase activity in, 667, 1525
position of within canopy, photosynthesis CO_2 acclimation and, 1037
roots of
aluminum-inducible mRNA in, mung bean hypocotyl auxin-regulated mRNA relation to, 718
Ca^{2+}-dependent transglutaminase activity in, 1115
White lupine, adenine translocator in, 1127
Wood phenotypes, red-brown, in quaking aspen, *O*-methyltransferase gene and, 101
Wound inducibility, of hydroperoxide lyase, Arabidopsis gene encoding, 1393
Wound signaling, in tomato, abscisic acid in, 687
Wounding, of tomato, mitogen-activated kinase kinase gene regulation in, 1526

X

Xenobiotic metabolism, in marine macroalgae, cytochrome P450 and, 123
Xylem
differentiation of, in soybean roots, salt stress and, 695
pH of, tomato leaf transpiration and, 703

Y

Yeast
copper homeostatis gene *ATX1*, *Arabidopsis thaliana* homolog of, 1227
V-type ATPase of, red beet protein homology to, 859

Z

Zantedeschia aethiopica, Rubisco in, 332
Zea maize (*see* Maize)
Zeaxanthin formation, in pea, dicyclohexylcarbodiimide and, 659
Zinc finger protein, in *Arabidopsis thaliana*, 331
Zucchini, hypocotyl of, spermidine binding to, 971
